CAREER OBJECTIVE

Aspiring Backend Developer with strong foundations in Python, Flask, SQL and Bash Scripting. Seeking an opportunity to design efficient APIs, work with databases, and contribute to high-quality software solutions while expanding my knowledge in systems engineering and data-driven development.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies IIIT RK Valley, (IIIT Idupulapaya), B.Tech in Computer Science and Engineering 10/2022 – 05/2026
CGPA: 8.53

Indian Institute of Technology Madras (IIT Madras), 01/2024 – 01/2028
BS in Data Science and Applications (Pursuing through online mode)
CGPA: 8.38

Rajiv Gandhi University of Knowledge Technologies IIIT RK Valley, (IIIT Idupulapaya), Pre University Course (PUC) 10/2020 – 09/2022
CGPA: 9.81

SKILLS

Programming Languages: — Python, SQL, HTML, Bash

Frameworks & Libraries: — Flask, Jinja2, Vue.js

Databases: — SQLite, PostgreSQL

Tools & Technologies: — Linux System Commands, Bash Scripting, Git, SQLAlchemy (ORM)

Machine Learning Knowledge: — Statistics, Linear Algebra, Calculus, Machine Learning Techniques

PROJECTS

Vehicle Parking System (Repo Link) [🔗](#)

Tech Stack: Flask, Jinja2, HTML, CSS, SQLite, SQLAlchemy

A full-stack parking management system with user and admin portals.

Features:

- Admin can view, search, edit, delete rental lots, view summary of rental lots, remove a rental spot if it is not booked, view registered users, view currently occupied rental spots, edit his/her profile.
- User can view booking history, view summary of previous rentals spots, search available rental properties, book a rental spot, and vacate a rental spot.

House Rental System (Repo Link) [🔗](#)

Tech Stack: Django REST Framework, React.js, Chart.js, SQLite, Django ORM, JWT Authentication

A rental management platform supporting user and admin functionalities.

Features:

- Developed a rental property management platform with secure JWT-based authentication
- Built RESTful APIs for managing rental listings, bookings, and property details
- Implemented search and filtering features to explore available rental properties
- Integrated CRUD operations for rental properties and booking records using Django ORM
- Added booking history tracking with rental duration and previous stay information
- Created responsive UI pages with HTML and CSS for easy browsing and booking

CERTIFICATIONS

Foundation in Programming and Data Science [🔗](#), Issued by IIT Madras

Python(Basic) [🔗](#), Issued by Hackerrank

SQL(Basic) [🔗](#), Issued by Hackerrank

SQL(Intermediate) [🔗](#), Issued by Hackerrank

ACHIEVEMENTS

- Secured **S Grade with 95 marks** for the academic project **Vehicle Parking System** in the part of **IIT Madras BS Programme**
- Topper in **Statistics-1** [🔗](#), **Statistics-2** [🔗](#), **Python** [🔗](#), **Computational Thinking** [🔗](#), and **English** [🔗](#) (IIT Madras - First Year),
Topper in **Database Management Systems** [🔗](#) (IIT Madras - Second Year)
- Earned **SQL 50 Badge - LeetCode** [🔗](#)
- Earned Four Star Badge in SQL - **Hackerrank** [🔗](#)
- Earned Five Star Badge in Python - **Hackerrank** [🔗](#)
