Agenda

Introduction to Machine Learning

Traditional Vs Machine Learning

In Class Assignment

Quote of the Day

Aptitude & Coding

First Step in AI

- ❖ AI is a branch of computer science by which we can create intelligent machines which can behave like a human, think like humans, and able to make decisions like a human.
- ❖ AI exists when a machine can have human skills such as learning, reasoning as solving problems.
- ❖ Example : ChatGPT, Capilot etc

Introduction

Artificial Intelligence

Artificial Intelligence

Machine Learning

What
?

What is
ML?

How
?

How to learn
ML?

Why
?

Why we learn
ML?

Where
?

Where is used
ML?

What is Machine Learning?

Machine Learning is a concept which allows the machine to learn from the experience using algorithms, and that too without being explicitly programmed.

Arthur Samuel (1959)

A computer program is said to learn “ if its performance at a task T , as measured by a performance P , improves with experience E .”

~ Tom Mitchell(1997)

In simple terms, Machine learning is the learn through data by using algorithms to generate a predictive model

-  Red
-  Green
-  Yellow

-  Green
-  Yellow
-  Red

How to start ML?

Types of Learning

Supervised
Unsupervised
Semi supervised
Reinforcement

Mathematics

Linear algebra
Calculus
Statistics
Probability

Programming language

Python
R
Java
C++

Why we learn ML?

JOB

**Research &
Development**

Weather Prediction

ML

Fraud detection

ML

Diseases detection

ML

Robot Navigation

ML

Diseases classifications

ML

Social Media Analysis

ML

Autonomous Vehicle

ML

Customer segmentation

ML

Recommendation systems

ML

Where is used ML?

Traditional Programming Vs Machine Learning

Traditional Programming

Machine Learning

Which of the following true about ML ?

A) Machine Learning is a field of computer science

B) ML is type artificial intelligence that extract patterns out of raw data by using an algorithm or method

C) The main focus of ML is to allow computer systems learn from the experience without being explicitly programmed

D) All the above

In traditional computer programming, you give input commands,
What do you give input with machine learning

A) patterns

B) programs

C) data

D) rules

How machine learning is related to Artificial Intelligence ?

A) AI focuses on classification, while ML is about clustering data

B) ML is a type of AI that relies on learning through data

C) AI is form of Unsupervised machine learning

D) AI & ML are same

Many of the advances in ML have come from improved _____

A) Statistics

B) Structured data

C) Availability

D) Algorithms

Machine learning is subset of _____

A) Deep Learning

B) Computer Vision

C) Natural Language Processing

D) Artificial Intelligence

**Don't wait for an opportunity,
If you have a skill, then the opportunity is definitely
waiting for you**

Coding & Aptitude

69. Majority Element

Input : [2,2,1,1,1,2,2] Output: 2

Alfred buys an old scooter for Rs. 4700 and spends Rs. 800 on its repairs. If he sells the scooter for Rs. 5800, his gain percent is:

**Thank
You**
